Global Pump® Standard Rotary Wellpoint pumps are specifically designed for wellpoint and underdrain dewatering applications.

Capable of handling both water and air, Global Standard Rotary Wellpoint pumps automatically prime and reprime without air elimination systems or operator intervention. Ease of application is inherent, as the positive displacement pump automatically develops the discharge pressure required.

The model 8GSRWP is capable of achieving maximum flows of 1,600 gpm (363 m³/h) and maximum discharge pressures up to 25 psig while handling water, air, and solids up to 2.5” (63.5 mm) in diameter.

The standard 8GSRWP is powered by a water-cooled, 4-cylinder diesel engine with reduction gearbox. Alternative drives are available, including other diesel engines or electric motor options.

### FEATURES
- Global Pump’s proven Rotary Helical Lobe pump with pulsation-free convoluted, Tri-lobe rotors
- Replaceable wearplate for front and rear covers for extended cover life
- Silicon Carbide on Silicon Carbide mechanical seals
- Direct drive through a flexible coupling and engine-mounted reduction gearbox
- Gearbox technology separates the pump head from the gearbox, eliminating cross contamination between pump media and gearbox lubricant
- Large suction and discharge header tanks for easy priming, draining and solids settlings
- Recirculation line between header tanks to ensure rotors are always wetted
- Standard engine control panel provides preset emergency shutdown protection and allows the addition of automatic level control
- Disassembly of the inlet and outlet pipework and pump housing is not necessary
- Standard skid-mounted format with integral fuel tank, tie downs, lifting bail

### OPTIONS
- Fuel tanks for extended run times and/or remote location as required
- Highway trailer with integral fuel cell/chassis, lights, fenders, tie downs, lifting bail, front and rear jacks. Trailer brakes can be offered as required
- Sound attenuated enclosure options
- Hose racks, accessory containers and other custom features available as required
- Wide range of suction and discharge fittings including Global Pump’s own “QD” Quick Disconnect fittings and accessories
**SPECIFICATIONS**

**Connections**
8” (200 mm) ANSI Flanges

**Maximum Pump Speed**
600 rpm (300-500 rpm normal operating range)

**Maximum Engine Speed**
2,250 rpm (1125-1875 rpm normal operating range)

**Maximum Flow**
1,600 gpm (290 m³/h) (214 cfm) of water or air

**Water Temperature Limit**
140° F (60° C)

**Solids Handling Capability**
2.5” (63.5 mm)

**Maximum Casing Pressure**
60 psig (414 kPa)

**Standard Compact Fuel Tank**
75 gallons (284 liters)

**Dry Weight**
3,900 lbs

**PUMP MATERIAL**
